LIBS TECHNOLOGY

COBRA

LASER PROCESS ANALYZER

The COBRA product line combines several advanced innovations for high throughput **process analytical technology (PAT)** in an industrial configuration adaptable to any conveyor belt width. It is capable of scanning and classifying/analysing up to 100 objects per second while outputting real time classification/quantitative data and statistics. **COBRA process analyzers uphold to the highest market standards for accuracy, performance, throughput and analysis speed.**

MINERALOGY

REAL-TIME ANALYSIS

PROCESS ANALYSIS

APPLICATIONS

- Ore grade monitoring/sorting
- Sorting metallic scraps
- Direct soil analysis
- Elemental process analysis
- Feed/tailing compositional control

ACCESSORIES & OPTIONS

- Beacon light
- OPC-server compliant data communication
- Analytical results processing software
- Remote control
- Security enclosure
- Mounting frame
